Contribution to Financial Sitrep 16 July 1985	
Romania	
Romania's financial situation has deteriorated in recent	
nonths, and Bucharest may need debt relief by late this year.	
Poor performance in hard currency trade has cut Romania's	
eserves	
	25
Disruptions in industry caused by a severe winter and	2
low energy stockpiles have depressed exports and increased	25)
imports.	
The US Embassy in Bucharest	
eports increasingly frequent complaints from Western firms about	25X
nissed payments.	25
	25
If Romania's payment problems continue to worsen, pressures	
to reschedule debt and renew IMF supervision will build. This	25X1
	_0,(1
would be particularly galling to President Ceausescu, who was humiliated by having to reschedule in 1982 and 1983 and has

Poland

Poland and the Paris Club of Western creditor governments signed an accord on 15 July rescheduling approximately \$12 billion in overdue debt from 1982-84 over a period of 11 years with five years grace, according to press reports. The agreement was initialed earlier this year, but formal signing was delayed when Warsaw tried to obtain new credits from the governments and failed to make required payments on arrears from the 1981 rescheduling agreement. To implement the agreement, Warsaw must now complete payments on arrears from the 1981 agreement, sign bilateral accords with individual governments and make interest payments on the rescheduled debt.

25X1

We estimate that Warsaw can cover only about half of the \$900 million due to governments under the agreement this year if it continues to give priority to imports and paying bank creditors. The Poles will probably demand new credits in the bilateral negotiations, but Western governments seem reluctant to extend new loans. The Paris Club has indicated it will reassess the agreement if Poland cannot meet its obligations but, the governments probably would demand that Warsaw negotiate new rescheduling terms with the banks as well to ensure equal treatment of creditors.

Yugoslavia	
Talks between US bankers and Yugoslav officials aimed at	
resolving the IMF's role in monitoring Yugoslav economic	
performancea major stumbling block to a multiyear rescheduling	
agreementended in New York on 13 July.	0EV4
	25X1 25X1
Yugoslavs, and the IMF agreed that in	
lieu of another standby program after April 1986, the Fund would	
conduct enhanced monitoring consisting of two Article IV reviews	
annually. The Fund would measure Yugoslav trade and financial	
performance against as yet unspecified "trigger" criteria. If	
performance fell below these standards, Belgrade could be	
required to take policy action to correct the problem and	
possibly negotiate a new standby program with the Fund.	25 X 1
	25X1
Talks with the full ICC advisory committee to reschedule	
\$3.5 billion in debt maturing in 1985-88 are now expected to	1
resume later this month. The key unresolved issues are interest	
rates and length of the rescheduling period.	05)/4
	25 X 1
If Yugoslavia fails to reach an agreement with	
the banks before 15 August it will be not be able to draw the	25 X 1
second tranche of its IMF standby credit.	25 X 1

Yugoslavia's hard currency account and trade deficits continue to show a sharp deterioration in comparison to 1984. The convertible currency account through April 1985 showed a deficit of \$359 compared to a \$31 surplus last year. The trad deficit of \$521 million for the first 4 months was over three times the deficit for the same period last year. Through 10 June, exports to hard currency areas were down 3 percent and imports up 9 percent from 1984.

Four major new loans were concluded for Eastern Europe
during the past month as EE borrowers took advantage at favorable
interest rates offered by Western banks. The low rates are
generally more indicative of high bank liquidity and lack of
other good international lending opportunities than of banker
enthusiasm over East European economic performance 25X
East Germany
East Germany received an eight-year, \$600 million loan after
intially asking for only \$200 million-its third large
oversubscription since late 1984. According to the US Embassy,
the East Germans will pay .75 percentage points over LIBOR for
most of the money. The syndicate is led by the Arab Banking
Corporation of Bahrain and includes about 75 banks; seven US $25X1$
banks reportedly will lend \$50-60 million. East German Foreign
Trade Bank President Polze
25X
told the US Embassy that East Berlin will use the 25X1
funds to maintain reserves and boost imports form the West in
1986-90. 25X ²

Hungary
Hungary signed a \$300 million dollar syndicated loan in
June, cofinanced with the World Bank, and earmarked for the
modernization of the petrochemical, food processing, and
transportation industries. The interest rate was set at .75
percentage point over LIBOR for eight years for the commercial
bank portion and 10 years for the World Bank share.
Oversubscription of the commercial bank portion resulted in an
additional \$125 million dollar credit from Western banks with the
same terms extended in the cofinancing package. The loan is part
of an \$800 million package that also includes a \$250 million
dollar Eurodollar loan provided directly by the World bank and a
\$125 million cofinanced yen loan from Japanese banks.
